Infinite Re-Appraised at CMMI V2.0 Maturity Level 5 for Development and Services (DEV & SVC)

ROCKVILLE, Maryland - Infinite Computer Solutions, a leading global technology company, today announced it has been independently appraised at Maturity Level 5 of ISACA's CMMI (Capability Maturity Model Integration) for both Development and Services. This multi-model assessment was performed by SQC (Software Quality Center) Global.

CMMI is a proven, outcome-based performance model and the globally accepted standard for improving capability, optimizing business performance and aligning operations to business goals. Maturity Level 5 is the highest level possible, and per ISACA, "indicates that the organization is performing at an "optimizing" level. At this level, an organization continually improves its processes based on a quantitative understanding of its business objectives and performance needs. The organization uses a quantitative approach to understand the variation inherent in the process and the causes of process outcomes."

This milestone showcases the company's dedication to achieving the highest industry standards, pursuit of continuous improvement, and commitment to excellence in the solutions and services delivered to clients. Infinite has a long history in adopting the latest process improvement models and best practices in the industry.

"We are very proud of our teams for achieving the highest level of CMMI maturity. Customers are at the center of everything we do, and achieving and maintaining development and service excellence enables us to help them meet their business goals" said Sanjeev Gulati, Executive Vice President of Infinite.

About Infinite

Infinite Computer Solutions is a global leader in digital engineering and IT services, with over two decades of experience helping clients turn digital transformation into business value. Headquartered in Rockville, MD and with a workforce of 15,000+ employees operating from 20+ global locations, Infinite supports more than 400 Fortune 1000 customers to optimize, modernize and scale their technology landscape.
